

CW300 Series Primary Sectionalizing Enclosures and Ground Sleeves

CW300 Series Sectionalizing Enclosures provide a low-cost, safe, aesthetically pleasing means of providing a sectionalizing and tap point for underground distribution systems. Available in sizes for use on single and three-phase systems rated 200A or 600A, 15kV through 35kV.

In addition to a wide range of standard sizes in mild steel, custom and non-standard size enclosures and colors are available. Also available in mild steel with zinc rich primer, aluminum or stainless steel for various environmental conditions.

Contact the factory or your local sales representative for pricing and availability.

**ISO 9001
CERTIFIED**

Enclosure Features

Wind stop is included for operator safety.

Durable powder paint finish exceeds ANSI standards; Munsell green (7GY 3.29/1.5) to blend with surroundings. Alternative colors available upon request.

Meets ANSI C57.12.28 standards for tamperproofness and finish characteristics. RUS approved.

Light gray junction mounting bars for high visibility in adverse weather.

Ground nuts conveniently located on mounting bar and on the enclosure back wall for concentric neutrals.

Top-hinge design for easy access to all electrical components.

Stainless steel penta-head bolt with padlock provision standard on all models for tamper resistance. Two pentahead bolts standard on larger enclosures for added security.

Stainless steel lifting provisions for ease of installation.

All stainless steel hardware and hinges for strength and durability.

Constructed of sturdy **14 or 12 gauge mild steel** as standard. Mild steel with zinc rich primer, aluminum or stainless steel available upon request.

All-welded construction.

CW300 Series Primary Sectionalizing Enclosures

ACCESSORIES:

- Factory installed junction modules 2, 3, 4 or multi-point
- Extra parking stands
- Risers for additional height or cable clearance
- Ground bus (bar or rod)
- Warning and danger decals
- Hold-down cleats for concrete mounting
- Custom junction mounting provisions

Fiberglass model pictured.

Ground Sleeves

Ground Sleeves are designed to be directly buried in the ground, providing a convenient and safe space for additional cable. They also securely anchor the sectionalizing enclosure without the need for base pads.

Metal or fiberglass models are available in a variety of sizes.
